

Subpart 3812—Minerals Under the Mining Laws

§ 3812.1 Minerals subject to location.

Whatever is recognized as a mineral by the standard authorities, whether metallic or other substance, when found in public lands in quantity and quality sufficient to render the lands valuable on account thereof, is treated as coming within the purview of the mining laws. Deposits of oil, gas, coal, potassium, sodium, phosphate, oil shale, native asphalt, solid and semi-solid bitumen, and bituminous rock including oil-impregnated rock or sands from which oil is recoverable only by special treatment after the deposit is mined or quarried, the deposits of sulphur in Louisiana and New Mexico belonging to the United States can be acquired under the mineral leasing laws (see § 3100.0-3(a)(1)), and are not subject to location and purchase under the United States mining laws. The so-called “common variety” mineral materials and petrified wood on the public lands may be acquired under the Materials Act, as amended (see part 3600).
